SUMMARY

Advanced Full stack Web and Mobile App Developer with **2+ years** of experience. Published **open-source libraries (25k+ downloads)** and developed features, while optimizing performance for large-scale apps in the UAE, Egypt, and USA markets.

SKILLS

Mobile: React Native, Expo, Native Modules, Skia

Frontend: React, TS/JS, Next, Tanstack Query, Redux Toolkit/Zustand,

Backend: Node, Express, SQL/NoSQL, Elasticsearch, REST, PHP, Laravel, Google Cloud, AWS

EXPERIENCE

Software Engineer

07/2025 – Present

[Dubizzle Labs / Bayut, Lahore, Pakistan](#)

- **AI-Driven Workflow Automation:** Orchestrated a unified **agentic pipeline using MCP servers** to synchronize GitHub, ClickUp, and Slack. Developed a single-command system that fetches daily tasks, summarizes tickets, cross-references Slack context, and analyzes the codebase to **automate PR creation and self-reviews**, reducing the manual overhead to a final merge verification.
- **Performance Engineering:** Led a multi-phase performance audit across the app. Replaced reactive onEndReached list loading with a custom **predictive-prefetch** scroll hook, **cutting first-100-record render times by 55-83%** across Property, Lead, ProConnect, and TruBroker Stories lists (e.g. Stories load time down from **23.3s to 3.9s**). Extended predictive prefetching app-wide tying data fetches to session init and navigation intent instead of component mount, taking ProConnect, Properties, and Transactions from **1-5s spinner-driven loads to near-instant (<100ms-1s)**, a **62-97%** improvement across journeys. Built scoped React Query persistence for the Overview page to eliminate cold-start jitter entirely, and is currently landing **New Architecture / Expo 53 migration work** (removing the JS bridge and thousands of unnecessary memoization wrappers) to unblock the next round of gains.
- **Agent Growth & Gamification:** Built TruBroker™ Badge Streaks and TruBroker™ Rewind (a story-style yearly performance recap with **custom card animations and native social sharing**) from scratch, plus ongoing TruPoints™ earning-activity and reward-value tuning, and wallet/credits UX fixes.
- **Search, Auth & Platform Reliability:** Iterated location search/filtering and recent-search functionality, fixed auth flows (OTP auto-submit, autofill, password validation), restricted off-plan lead features by agency type, and handled ongoing release engineering (staging/production back-merges) plus **infra work: Typesense proxy migration, E2E test setup, dependency/security upgrades**.
- **TruBroker™ Stories Platform:** Owned the core stories feature end to end: creation, upload, viewing, and management. Rebuilt uploads as a resumable, non-blocking background system with live activity tracking, migrated the compression pipeline twice (**landing on a custom in-house video/image editor built on ffmpeg-kit and saving a 16,000 pounds worth of subscription**), added automatic **long-video splitting with bitrate/resolution controls**, and shipped **screen-capture tracking and the Free Stories (1+1) reward feature**.

Software Consultant

02/2026 – Present

[We Are Very, California \(Freelance-Remote\)](#)

- Developed a **custom hardware-accelerated compression mechanism** for the platform by building the [expo-image-and-video-compressor](#) library, providing native **H.264 & HEVC encoding** for Expo and React Native

Associate Software Engineer

12/2024 – 06/2025

[Seven Stacks, Lahore, Pakistan](#)

- Developed and maintained full-stack web applications using Next.js on the frontend and Sails.js on the backend. Worked extensively with **AWS services, including EC2, S3, and RDS**, and collaborated closely with QA and design teams.

Software Engineer Part-Time

10/2024 – 05/2025

[SocialDev, Cyprus \(remote\)](#)

- Developed HebrewLearn mobile app (Expo) and company portfolio, focusing on responsive UI/UX.

React.js Intern

06/2024 – 08/2024

[Arbisoft, Lahore, Pakistan](#)

- Created a MERN expense tracker and contributed React.js/Django integrations for [edX](#).

PROJECTS

Open Source Libraries:

- [Expo-image-and-video-compressor](#) (22k+ downloads)
- [@faeizfurgan/expo-story-video-and-image-editor](#)
- [expo-blur-face](#)

Field Projects:

- [Profolio](#)
- [Bayut](#)
- [edX](#)

Others:

- [Odysseus Bow](#)
- [Ironman-Hand](#)
- [Buy-Bye](#)
- [Free-CS](#)
- [Porsche-Website](#)
- [Socialdev-Website](#)
- [Expense-Tracker](#)

CERTIFICATIONS

- [Model Context Protocol: Advanced Topics](#)
- [Claude with Amazon Bedrock](#)
- [Claude on Google Cloud](#)
- [Building with the Claude API](#)
- [Claude Code in Action](#)
- [Teaching AI Fluency](#)
- [AI Fluency for Builders](#)
- [AI Fluency for Small Businesses](#)
- [AI Fluency for nonprofits](#)
- [AI Fluency for pK–12 Educators](#)
- [AI Fluency for educators](#)
- [AI Fluency for students](#)
- [Claude Code 101](#)
- [Introduction to subagents](#)
- [Introduction to Model Context Protocol](#)
- [Introduction to agent skills](#)
- [Introduction to Claude Cowork](#)
- [AI Capabilities and Limitations](#)
- [Claude Platform 101](#)
- [Claude 101](#)
- [AI Fluency: Framework & Foundations](#)

EDUCATION

Bachelor of Science in Computer Science, COMSATS University

09/2021 – 06/2025
